

Class name: Car

Methods:

- `__init__(make = "none", model = "none", year_manufactured = "none", color = "none", num_doors = "none", max_passengers = "none")`
 - Initializes Car object
- `set_make(make_of_car: string) --> none`
 - sets the make of the car object
- `set_model(make_of_model: string) --> none`
 - sets the model of the car object
- `set_year(year_car_manufactured: int) --> none`
 - sets the year the car object was manufactured
- `set_color(car_color: string) --> none`
 - sets the color of the car object
- `set_doors(car_doors: int) --> none`
 - sets the number of doors the car object has
- `set_max_passengers(max_passengers: int) --> none`
 - sets the maximum number of passengers the car object can hold
- `get_make() --> string`
 - returns the make of the car object
- `get_model() --> string`
 - returns the model of the car object
- `get_year() --> int`
 - returns the year the car object was manufactured

- `get_color()` --> string
 - returns the color of the car object
- `get_doors()` --> int
 - returns the number of doors the car object has
- `get_max_passengers()` --> int
 - returns the maximum number of passengers the car object can hold
